

Our Inspiration

No two planks are the same. The Avaron styles are produced by a unique thermal process to achieve the deep rich color visuals. Wood is a natural product and each plank will react differently to this process resulting in color variation. This kind of variation helps display the true wood characters and is one of the most desired attributes in hardwood flooring.

DUAL Hand Process

Every plank has been processed not once but twice by the hands of our skilled Craftsmen. Along with the thermal treatment process you get a floor that has a range of colors instead of one that is monotone. These colors are so vibrant they will bring life to any room regardless of where the floor is installed. Each style is labeled with one of the ratings below to help you select the perfect flooring that fits you design style.

Images and actual hardwood floor samples are intended as visual guides and not as the exact representation of the hardwood floors. Wood is a natural material containing distinctive differences in color, texture and grain. Knots & mineral streaks may not be present on every plank. Furthermore, sheen or gloss level and the overall appearance of the floor may look different when viewed at various angles and lighting conditions. Before you install any flooring product, we recommend that you rack out a box or two to verify that the product you have ordered is within the acceptable color range and fits your design style. Color variation ratings serve only as guides. Color and grade of all natural products must be inspected and approved by the consumer prior to installation. Any flooring installed will be considered acceptable and no claims will be valid based on visible appearance after installation.
